COMmand

- The draft JMTK RFP is posted to the following web site:
  - > http://arc.westfields.net/cjmtk
  - > The SOW and sections A-K, L, and M are included as well as other documentation.
- The final RFP will be issued on 6 September 2000 with 30 day response time for proposals.
- Contract will be awarded February 2001, contract startup will be March 2001.
- Final product scheduled for release in 2003.

- At June AOG (2 June 00) the Navy Rep (with concurrence from DII COE Chief Engineer) blocked the introduction of our Real Time (RT) mapping requirements into the JMTK SRS.

- In preparation for RFP, MCG&I RWG met in Rome, NY 7-9 June to discuss and finalize work being done on JMTK SRS.

  > Air Force MCG&I Rep (Paul Brown) provided a JMTK Architecture Requirements document which **included** requirements for configurability, scalability, and **our Real Time requirements**.

  > The discussion provided insight into why the Navy AOG Rep opposed these requirements and also provided a forum for compromise on the different issues.

- Compromises were reached on the 4 requirements originally under dispute.
- Army agreed to strike the requirement for an Ada 95 binding, however we think there is a need to ensure that the specifications are written in a language independent format.
- A separate optional requirement for a Java binding has been added to the real time requirement section.

VETRONICS EA Team

- Due to other activities, I will not be able to guarantee my attendance at all of the RT DII COE TWG's in the future, therefore I have stepped down as the Mapping Subgroup Lead.
  - > Thank you all for your support in our efforts, getting the RT requirements into the JMTK RFP was a great step in the right direction!!
  - > I will continue to support the IPT/TWG as much as possible.
- The group agreed that until the JMTK commercialization effort is further along, there is no real work for this group at this time.
  - > No meeting in Boston, potential to have a meeting during the January meeting.
- No current volunteers for the new Subgroup Lead. See John Maurer if interested!!
